

TO: Congoleum Customers
FROM: Congoleum Installation and Technical Office
SUBJECT: Ultraply Underlayment - Approval for Congoleum Floors

Ultraply Premium Underlayment is approved for use with all Congoleum resilient sheet flooring and tile products installed in residential applications. Ultraply meets Congoleum's underlayment requirements as outlined in the Congoleum Professional Installation Guide. The clear face veneer, solid core, marine grade phenolic glue and calibrated 5.5mm thickness are all characteristic of quality underlayment.

As with any underlayment or supplemental installation product, all warranties and recommendations for installation and intended use rest with the manufacturer of the product and not with the Congoleum Corporation. The Moreland Company USA assumes responsibility for all warranties and claims related to Ultraply Premium Underlayment.

A handwritten signature in black ink that reads "Robert Dempsey".
